Insoles for WINSHOE

Wireless embedded pressure sensors

The smart and best for value solution for a wireless inshoe pressure measurement.

After 3 years of research Medicapteurs is proud to launch W-inshoe :

An innovating in shoe pressure measurement tool.

2 lightweight units (50g) driving 8 ultra thin calibrated sensors included in a flexible insole (2mm).

W-inshoe is the only solution to measure precisely pressures on targeted zones. This is the perfect device to validate treatment such orthosis, orthopedic shoes, orthoplasties in real conditions.

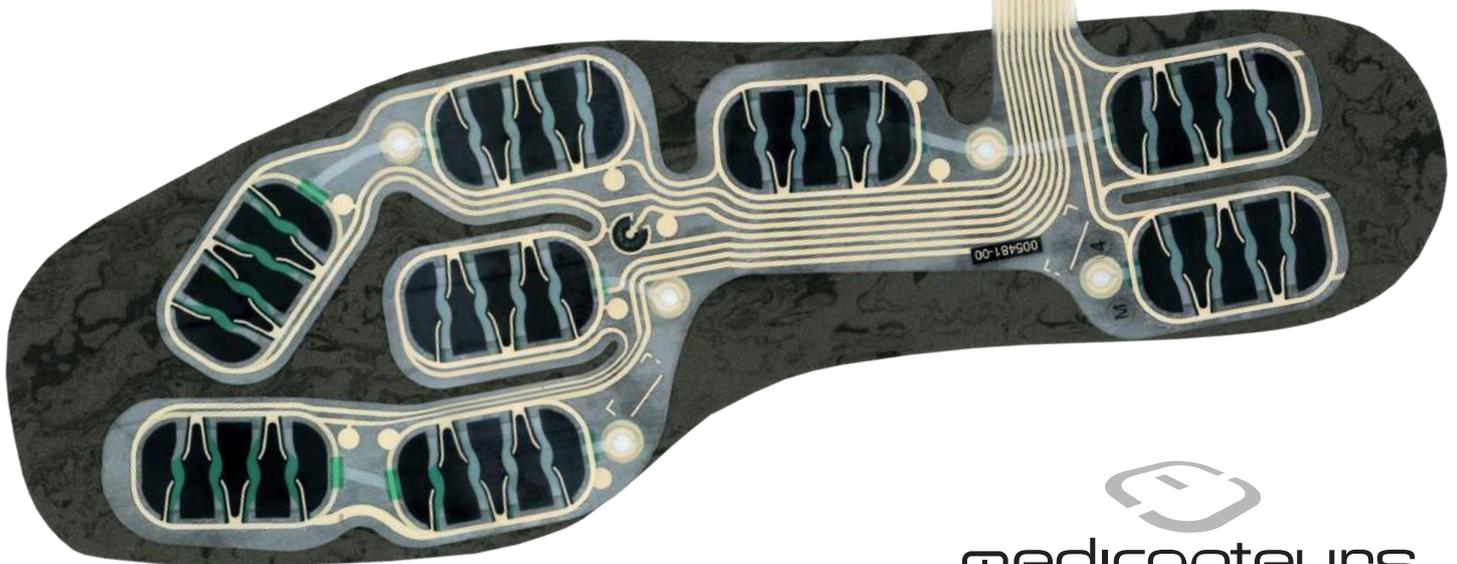

Technical Characteristics

Unit dimensions	65 x 46,5 x 18,3 mm
Unit weight	50 g
Sensors type	Calibrated HD résistive sensor
Number of sensors	8 sensors per unit
Size : S,M,L,XL	Range 35 to 46
Sensor thickness	0,5 mm
Min/Max pressure per sensor	0,1 KgF to 8 KgF
Guaranteed number of activations	> 1 000 000
Acquisition frequency	100 images/second
PC/Unit interface	Bluetooth®
Battery life in acquisition mode	5 hours
Battery charge	Power supply/USB
OS	Windows 7, 8, 10

Lightweight blue- tooth units

- 100 Hz Acquisition
- Automatic Synchronization of the 2 Units
- Fast charge USB (1h30)
- Easy Clips fixation
